---

\*No more than 2,000 words in total for all the following sections

**Section 2: Professional / Industrial Knowledge**

[Please demonstrate your knowledge in your Industry Sector]

**Section 3: Generic Management Knowledge**

[Please demonstrate your generic management knowledge such as management process - planning, organising, leading, controlling, communication, etc.]

**Section 4: Project Management knowledge**

[Please demonstrate your project management knowledge such as agile project management, project constraints, project life cycle, project office management, project planning, project risk, project resources control, stakeholder management, negotiation skills, etc.]

### **Section 5: New Technology**

[A brief illustration of your knowledge about new technologies and how to apply them to a real-life project]

### **Section 6: The roles and responsibilities of a Project Manager**

[A brief illustration of the roles and responsibilities of a Project Manager, please give an example of how you apply your management skills/knowledge to a real-life project]

### **Section 7: Case demonstration**

[Use any project that you have managed to demonstrate how you apply your generic / project management knowledge to oversee the project. If possible, it is preferred to use a project with a problem(s)]

### **Section 8: Ethical behaviour**

[Please illustrate briefly that you encounter possible unethical situations arising, behave with integrity and in an equitable manner with good faith and good conscience, that affect the management process of a project]
