

HKIPM CPD Webinar - The use, application and case sharing of drone and mobile device to conduct and manage remote site surveillance or distance business

Date : 30 June 2020 (Tuesday)
Time : 19:00 – 20:00
Platform: Online via Zoom
Language : Cantonese supplemented with English terminology

Programme Highlights

Organised by HKIPM and supported by IVE Engineering, the seminar will overview various technologies that are currently at the fingertips of citizens such as drone and mobile phone etc. This seminar will also share cases on the approach, issues and benefits in the adoption or migration of existing practices into an online workflow. Further, given streamlined field/office workflow and its inherited enhancement in quality, health and safety, accessibility as well as mobility, the seminar will also discuss the potential feasibility of the "Work from Site" mode of operation.

Speaker: Mr. Raymond Wong, Director of ODEN Systems

Raymond is one of the few professionals who possess background and experiences in IT, construction and engineering. In the past, Raymond has been leading and managing consulting, system implementation and R&D projects with mixed technologies of IT, GIS, 3D and mobile wireless. Raymond has been active recently in promoting and sharing proven cases that have utilized online workflow to support and facilitate distance business in various disciplines. With background in land surveying, Raymond is also a chartered IT professional and corporate member of HKIPM as well as HKIEIA (Hong Kong Institute of Environmental Impact Assessment) and HKIQEP (Hong Kong Institute of Qualified Environmental Professionals).
